

EU Environmental Policy and Law: Examination rules

The aim of the course is acquiring in-depth knowledge and the theoretical knowledge of the EU environmental policies and laws.

Upon completing this course students shall be familiar with the policies and laws of environmental protection in the EU and Serbia. Also the student shall be prepared for legal and expert engagement in this field, either within the State Administration bodies, non-government agencies or private practice, as well as capable of undertaking further research work on this topic.

The students will have 2 exam questions. The first question is a presentation of an essay prepared on a topic discussed on the classes. The second question is a presentation of one case from the list of Case law discussed on the classes.
